

Education Tech Summit 2021

- Security & Compliance med Office 365

Sikkerhed & compliance for uddannelsesinstitutioner med Microsoft Office 365

Agenda

- Er Security & Compliance vigtig for uddannelsesinstitutioner?
- Overblik over Microsofts Security & Compliance features
- Anbefalinger til at øge sikkerheden og sikre optimal databeskyttelse
- Værktøjer til at komme i gang

Er digital sikkerhed nødvendig for skoler?

22-09-2020

Stor stigning i cyberangreb på skoler

kerne ser studerende, der vender tilbage til virtuelle lektioner som enkle kan omfatte ondsindet phishing, såkaldte "Zoombombs" og endda ransomware

Hvorfor skete der cyberangreb i Baltimore County skoler?

50 britiske skoler inficeret med ransomware

News

Surge in 'devastating' ransomware attacks cripples schools

James Carr

Alert: Further targeted ransomware attacks on the UK education sector by cyber criminals

The NCSC is responding to further targeted ransomware attacks on the education sector by cyber criminals.

School cyber-attack affects 40,000 pupils' email

"The challenge exists not in the security of the cloud itself, but in the policies and technologies for security and control of the technology. In nearly all cases, it is the user – not the cloud provider – who fails to manage the controls used to protect an organization's data.

'Through 2022, at least 95% of cloud security failures will be the customer's fault."

Microsoft Security

Only a quarter of Microsoft customers are actively using the security products they've purchased

Azure AD Conditional Access

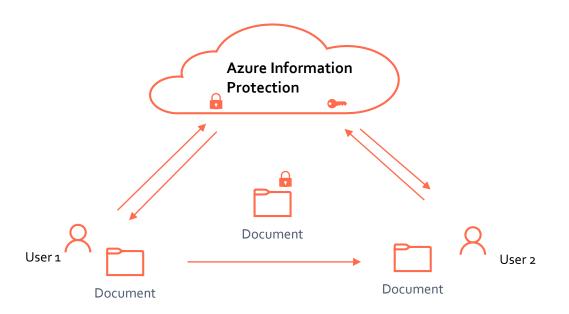

Microsoft Defender for Office 365

Azure Information Protection

Classification & Labeling: "Highly Confidential"

Encryption Tracking Revocation

Azure Information Protection

Classification & Labeling:

Manually classify documents based on labels like "Highly Confidential" that is associated with a certain group access

Encryption: The encryption follows classification labels

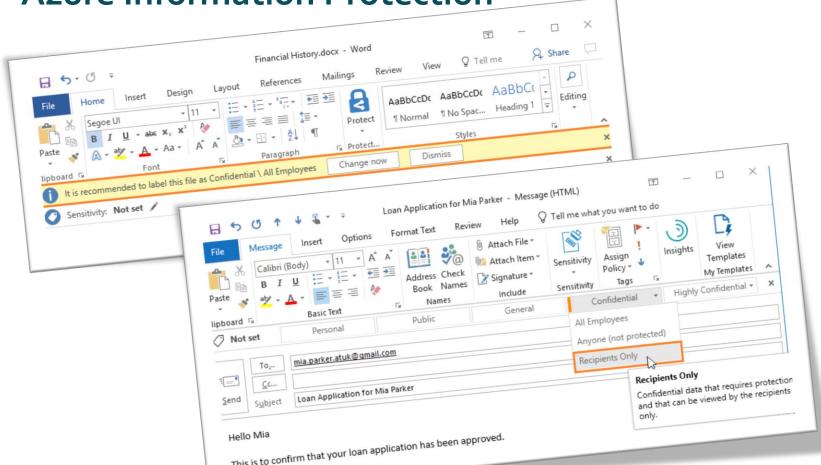

Tracking: who/where document is accessed

Revoke access previously granted

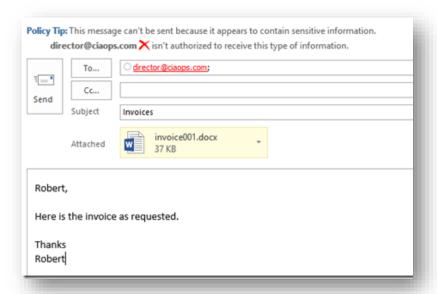

in Logic

Azure Information Protection

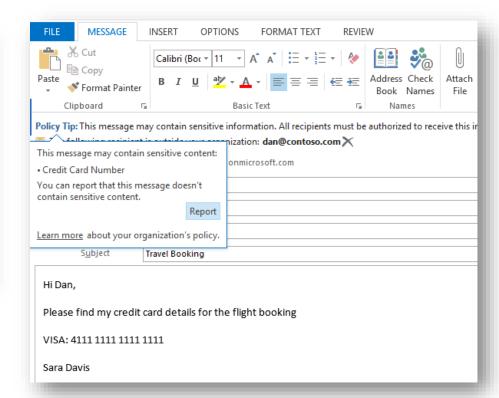

Data Loss Prevention

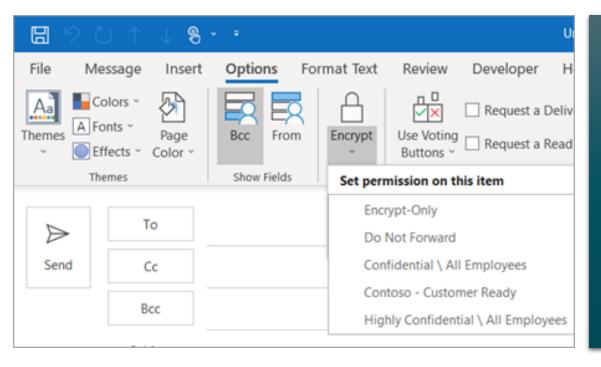

The DLP feature in Office 365 will automatically classify data and use the set policies to stop an email from being sent and block unauthorized access to classified content.

Office Message Encryption

When you need to protect the privacy of an email message, encrypt it.

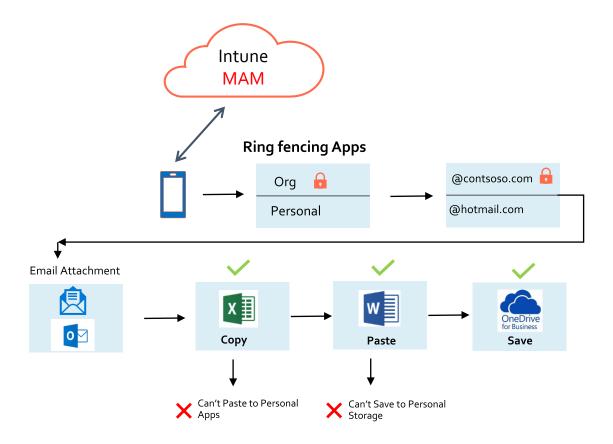

Encrypting an email message in Outlook means it's converted from readable plain text into scrambled cipher text. Only the recipient who has the private key that matches the public key used to encrypt the message can decipher the message for reading.

Any recipient without the corresponding private key, however, sees indecipherable text.

Intune – Mobile Application Management

Intune MAM does two things without requiring Device Enrollment:

- Separates company managed apps from personal apps, and set policies on how data is accessed from managed apps
- Ensures corporate data cannot be copied and pasted to personal apps within the device

Microsoft Security

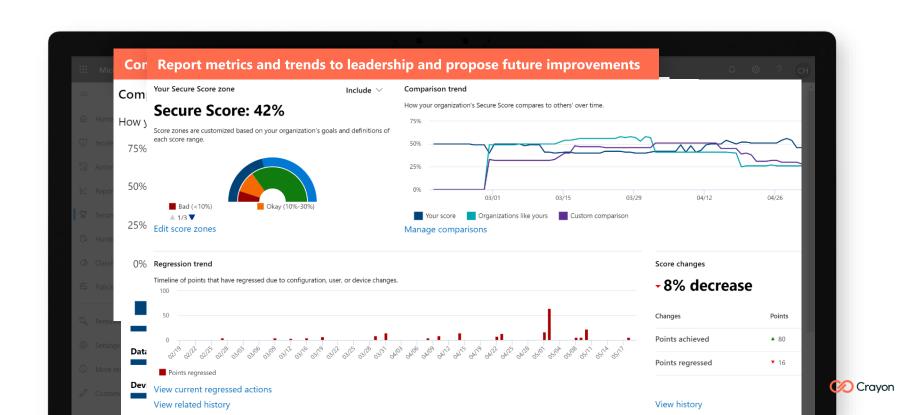

93%

of all breaches could have been avoided if basic cyber hygiene had been in place¹

Next step: Strengthen your security posture

VISIBILITY AND GUIDANCE WILL HELPYOU TAKE FULL ADVANTAGE OF YOUR SECURITY PLATFORM

Microsoft Compliance technology

Information Protection & Governance

Protect and govern data wherever it lives

Insider Risk Management

Identify and take action on critical insider risks

Discover & Respond

Quickly investigate and respond with relevant data

Compliance Management

Simplify compliance and reduce risk

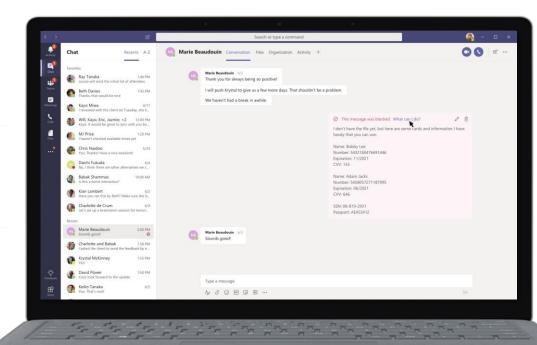

Data Loss Prevention for Microsoft Teams

PREVENT SHARING SENSITIVE INFORMATION IN A CHANNEL OR CHAT SESSION

Automatically block messages which contain sensitive information

Educate and guide end-users with notifications and "policy tips"

Unified classification engine supporting 90+ sensitive information types and custom sensitive info type creation

Microsoft Information Governance

INTELLIGENT AND BUILT-IN DATA AND RECORDS MANAGEMENT

In-place management

Retain data and manage records where your users collaborate

Automated policy

Classify and govern data at scale with pattern recognition and trainable classifiers

Ongoing data ingestion

Manage chats, social, and collaboration data beyond Microsoft with high-fidelity import

Enhanced defensibility

Demonstrate compliance with proof of disposals, defensible disposition, and rich audit trails

Information Governance

Keep what you need and delete what you don't

Records Management

Manage high value content and meet recordkeeping obligations

Insider Risk Management

IDENTIFY AND TAKE ACTION ON CRITICAL INSIDER RISKS

Rich insights via tailored templates

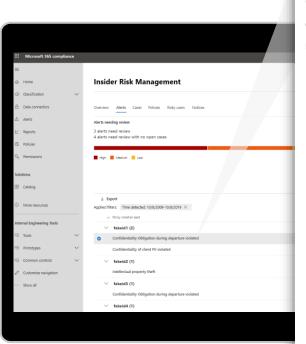

Machine learning correlates native and third-party signals to identify insider risks

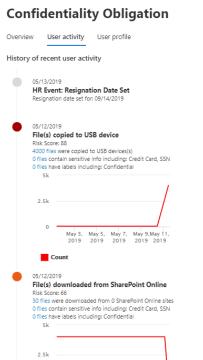

Privacy built-in

Anonymity controls ensure data about risks is appropriately managed

End-to-end investigations

Integrated investigation workflows allow for collaboration across IT, HR, and legal

Communication Compliance

QUICKLY IDENTIFY AND REMEDIATE CORPORATE CODE-OF-CONDUCT POLICY VIOLATIONS

Intelligent customizable playbooks

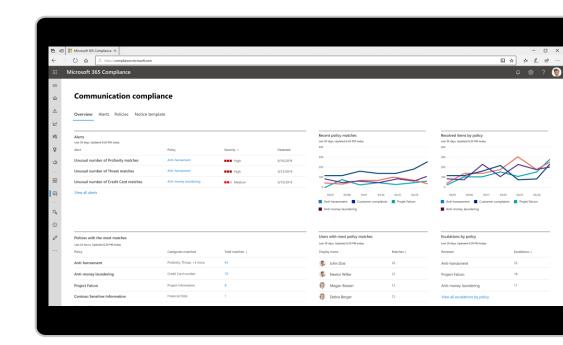

Leverage machine learning to detect violations across Teams, Exchange and third-party content

Flexible remediation workflows

Remediation workflows to quickly act on violations

Actionable insights

Interactive dashboard with policy violations, actions, and trends

Advanced eDiscovery

QUICKLY FIND AND RESPOND WITH ONLY THE RELEVANT INFORMATION

Custodian Management and Communications

Preserve content by custodian, send hold notifications and track acknowledgements

Deep crawling and indexing

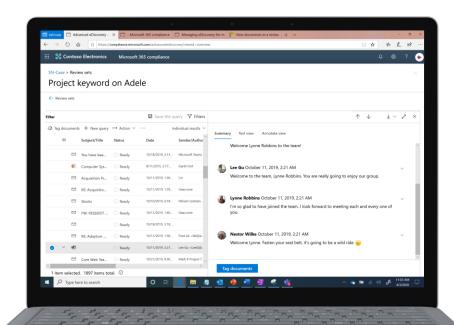

Deep processing (e.g., much higher size limits, non-Microsoft file types) to extract and index text and metadata

Review and manage case data

Manage static sets of documents within a case, that can be independently searched, analyzed, shared, and acted upon

Cull your data intelligently with ML

Near duplicate detection, email threading, themes, and ML models to identify potential high value content

Microsoft Compliance Manager

SIMPLIFY COMPLIANCE AND REDUCE RISK

Continuous assessments

Detect and monitor control effectiveness automatically with a risk-based score

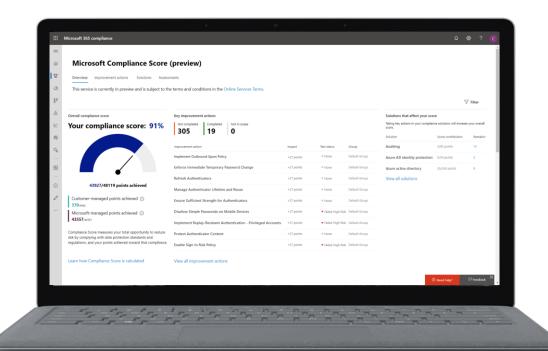

Recommended actions

Reduce compliance risks with actionable guidance

Built-in control mapping

Scale your compliance efforts with built-in mapping across regulations and standards

Compliance Score is a dashboard that provides your Compliance Score and a summary of your data protection and compliance posture. It also includes recommendations to improve data protection and compliance. This is a recommendation, it is up to you to evaluate and validate the effectiveness of customer controls as per your regulatory environment. Recommendations from Compliance Manager and Compliance Score should not be interpreted as a guarantee of compliance.
